

Franciscan University of Steubenville
Clinical Mental Health Counseling Department
Vital Statistic Report 2018-2019

From August 2018 to August 2019, there were 44 students enrolled in the Clinical Mental Health Counseling Program; of these, 40 are full-time and 4 are part-time. Between August 2018 and May 2019, there were 20 graduates from the Clinical Mental Health Counseling Program. The completion rate of full and part-time students who were enrolled in the program during this time period is 77%. Full-time students who finish their degrees on time do so in two years (including a summer semester between the first and second years). Part-time students can take 3-7 years to graduate. The current pass rate for students who took the NCE in 2018-2019 was 100%. This pass rate does not reflect data on all students, some of whom take the exam off campus and in other states. Data is not available for those students. The NCE is the licensing exam used in most states. Findings from the most recent Alumni survey indicated that 13.89% of students found employment prior to graduating; 50% found employment within 1-3 months of graduation; 22.22% found employment within 6 months of graduation; and 11.11% had not found employment in a counseling-related field.
